## SKAARHOJ

Universal Broadcast Controllers

Our passion is to make it easier for you to run your live event productions!

With our products you will feel the control at your fingertips. You can simplify. You can control multiple devices, even from different brands - all from the same surface. You will save precious rack space. You will have less wires, less boxes and more control. And you will be able to reconfigure and expand your controller every day, week, month and year to work with your new camera, new switcher, and new router.

We honestly believe we make the best universal broadcast controllers on the planet and we would love to make your professional life easier with them.

Kasper Skårhøj

CEO, Founder and Chief Designer

AUDIO

## **Control Anything**

## and Everything...

vMix All our controllers can talk to the same devices since they run the same software OS, UniSketch. Simply choose your form factor based on what is most appropriate. Install the device UniSketch cores required to talk to your broadcast hardware. Through UniSketch you map buttons to commands. Integrate control of multiple brands of broadcast devices to bridge hardware ecosystems.

## **Supported Hardware**

We call them *device cores* and they are like "apps" you install on your controller. We write new device cores all the time! So every day your controller becomes more and more valuable and flexible because new device cores are just a click away.

Here are some of the brands and products in the broadcast and AV industry that we support already or are in the process of supporting.

How does UniSketch and Device Cores work? Check out the last pages in this booklet.

## Signature Technologies

**Graphical OLED displays** to support buttons, knobs and faders with dynamic labels. They combine large, bold labels with unprecedented levels of detail using titles, icons and scales to enrich the main content. They automatically draw information from the connected devices or you can type in your own labels or upload graphics. Found everywhere in many sizes and dimensions on SKARHOI controllers.

UniSketch OS connects a button press with a command sent to any of the supported broadcast devices, simply speaking. You can typically operate 8 devices simultaneously and UniSketch binds it all together into a seamless and user friendly experience. You won't find a more impressive engine for integrated control in a standalone controller surface.

**100% IP & PoE:** One cable carries power and the signals for as many devices as you control. Your switcher, video router, recording deck, your cameras even. The future is IP while legacy serial systems can typically be supported by end-point converters which is often more convenient anyway. And active Power over Ethernet (IEEE802.3af) unclutters

#### SKAARHOJ

#### Options you will encounter in this booklet:

Add best-in-class NKK buttons with sculptured caps to the lower bus row and MF section for old-school luxury.

The SDI option adds a Blackmagic Arduino shield on the controller for reading and writing Camera Control data.

Add general purpose opto-isolated inputs and relay outputs, 2x8 ln/Out.

Upgrade to an industrial precision Hall Effect joystick for increased ergonomic comfort and motion precision.

RGB backlight and LED bars is not just impressive and soothing. It's also super practical to color code sections based on their assigned functionality. This provides the operator with instinctive clues which can be the critical difference between success and failure. Colors can be assigned manually and SKAARHOJ panels are dimmable.

- Four-way buttons custom molded tactile elastomer buttons, that detect whether a button is pressed on the left, right, lower or upper edge. This allows the button to adjust values up and down like an encoder when pressing opposing edges. It could even work as a simple joystick. Or it can be just a button. Innovative, insanely flexible and perfect for a universal controller.
- Renown Industrial Design for years we have deligently designed and fine-tuned our custom elastomers, aluminum extrusions and front panels to become unique, beautiful and strong components worthy of the superbly flexible and modular electronics and software that make up our wonderful broadcast and AV controllers.

## PTZ CONTROL

OMG your stuff is the cleveres coolest kit I've ever come acros

Operate robotic systems from Panasonic, NewTek, Ross, Lumens, PTZOptics, AIDA, Sony, JVC, Vaddio, Marshall, Agile, Avonic, Bird Dog, Bolin, and more....

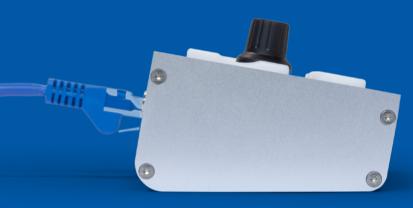

#### **PTZ Wiz**

#### 1:1

PTZ Wiz - the super compact IP based PTZ controller and switcher surface in one!

## PTZ Fly

PTZ CONTROL

PTZ Fly has a very compact form factor while featuring a full size three-axis joystick. Pan, tilt and rotate the handle to control your cameras. The superb OLED displays clearly show what camera settings you control and which preset you recall. With UniSketch, everything is possible. Customize it with a Hall Effect joystick or an SDI output for Blackmagic Micro Studio Camera control on a pan-tilt head.

**SKAARHOJ** 

# **CAMERA SHADING**

Can I just say how impressed I am with your level of customer service, it is exceptional

Shade cameras and gear made by Arri, Sony, Panasonic, JVC, AJA, Ross, Marshall, RED, Blackmagic Design, DreamChip, Canon, Ensemble Designs, and many more!

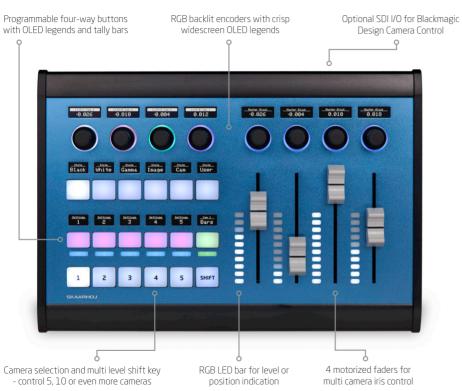

#### **SKAARHOJ**

## **Color Fly**

Color Fly is your uncompromising multi camera RCP bringing you innovative iris control with motorized faders. You get the tactile position feedback of the classic iris joystick but can easily manage 5, 10 or more cameras from the same compact panel.

One RCP to rule them all

#### SKAARHOJ

**RCPv2** - the world's most flexible RCP. Fits into your existing bay or sits console style on a table top. Use this universal RCP regardless of which camera brand you shade! With the **roller wheel** or **motorized fader** option you have the perfect multi camera RCP. Dedicated to scalability and a positive, unified user experience.

# VISION MIXING

I love your products and the way you are making live production easier!

Control switcher and automation solutions from Blackmagic Design, NewTek, Vimeo, vMix, Roland, Ross, CuePilot, Epiphan, and AzilPix

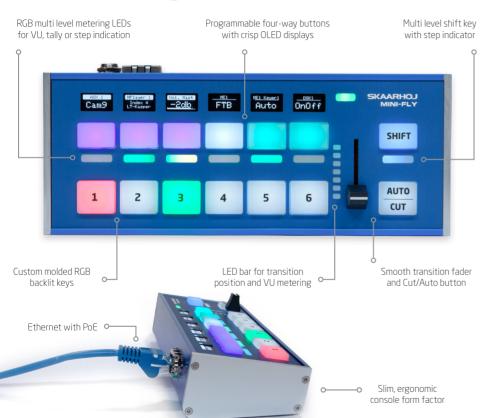

#### **SKAARHOJ**

SKAARHOJ controllers excel in live switching. The **Mini Fly** is your **Swiss Army knife**. It's super compact and yet super flexible, perfect for small live productions with 6 cameras, audio monitoring and transitions. And the six four-way buttons with OLED displays extend its power beyond imagination. Don't get us started...

## **Mini Fly**

**VISION MIXING** 

#### **SKAARHOJ**

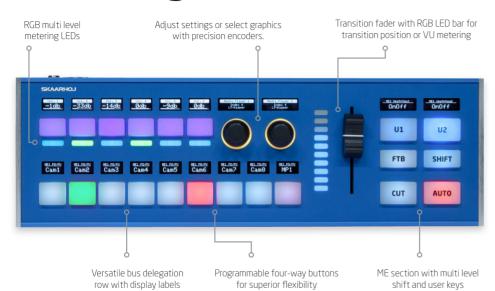

**Live Fly** is a professional midsize controller for 8-camera productions, that easily extends beyond when paired with **XPoint 24**, **Inline 10** or **PTZ Fly**. For that über-pro feel, you can add classic broadcast buttons from NKK as an option.

**1299€ / 1499\$**Full freedom, all devices cores

## **Air Fly**

With **Air Fly** you have a full featured desktop controller for live switching with **Tricaster**, **ATEM** or **vMix** systems at a very competitive price point. Works out of the box! Nevertheless you can still customize its function through the UniSketch OS. Strong industrial design.

ATEM, TriCaster and vMix variants

o have unique key labels designed for the features of each system

## **Air Fly Pro**

#### Revised design -Total freedom

For those who require **the ultimate** there is no way around the **Air Fly Pro** which brings you an impressive amount of four-way buttons, OLED displays, PTZ control, professional T-bar transitions and therefore the ultimate ...

### Freedom

## BROADCAST AUDIO

Audio control is not always a separate concern to the video producer. SKAARHOJ controllers generally give you access to audio adjustments and monitoring through encoders and four-way buttons and by means of multi level LED bars. If that doesn't cut it, Wave Board is to the rescue with eight motorized faders, full color LED bars, a four button control section per channel and global function keys to multiply it all at your will. Exceptional.

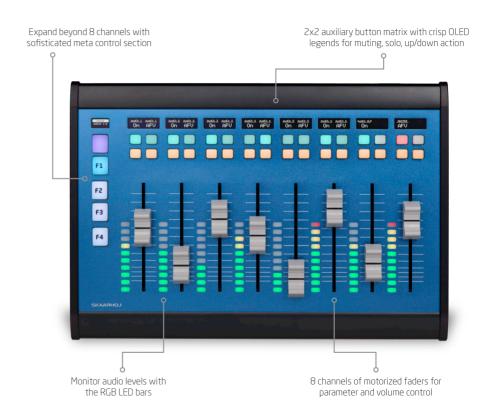

#### **Wave Board**

#### **REPLAY**

A replay controller with speed control and IP connectivity. The **XC8** interfaces with modern replay solutions such as m:replay from Softron, the built-in engine in vMix, and 3Play from NewTek.

(planned

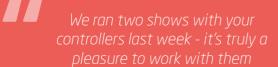

### **XC8**

## Custom designed jog/shuttle wheel

## ROUTING & UTILITY

Control video routers, window processors, multiviewers, monitors, software, recording decks and streaming devices from brands such as AJA, Blackmagic Design, Watchout, Grass Valley, Ensemble Designs, QSC, CasparCG, Sony, Roland, Panasonic, and Atomos.

#### **SKAARHOJ**

## Rack Fly Series

**Rack Fly Uno and Duo** are raw muscle. All programmable four-way buttons. All RGB color coded. Far from all too much though - you deserve this for your universal control needs whether it's a video router, your VSM system or an AUX bus.

#### **SKAARHOJ**

Probably the world's most flexible rack controller! **Rack Fusion I** has 12 awesome four-

ROUTING & UTILITY

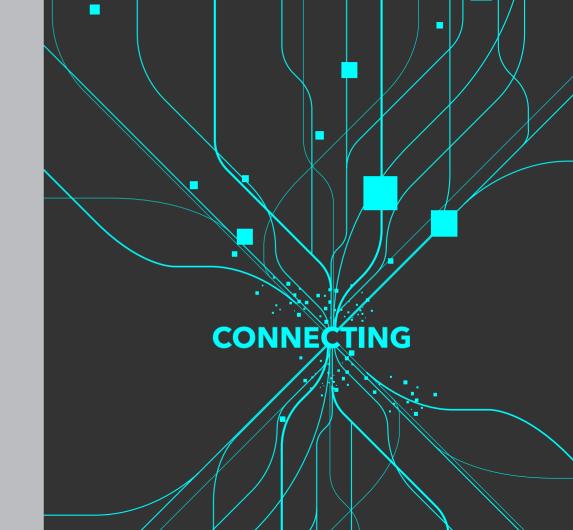

**ROUTING & UTILITY** 

# CONNECTING THE DOTS

I want to thank you and your team for going the extra mile for us

#### Link 10

The Link IO series are boxes which typically perform an IO or conversion task of some sort. Use them to move signals forth and back over Ethernet, SDI and binary I/O wires.

#### **ETH-GPI Link**

Ethernet to General Purpose Interface with UniSketch OS. Connects relays and opto-isolated inputs with network events. Use it to switch or route a source, start/stop recording, turn on tally lamps etc. 2x8 Inputs/Outputs with option for additional 2x8 I/O.

₩ 479€ / 549\$
Dual option: 729€ / 849\$

#### **ETH-SDI Link**

Receives "UDP Camera Control" information over Ethernet and forwards it on the SDI out connector. A number of alternative firmwares exist for this device to address various use cases.

**₩** 429€ / 499\$

#### **ETH-LANC Link**

Converts data to and from ethernet for use with SKAARHOJ controllers, for instance to enable Sony LANC and Canon RC-V100.

∰349€/399\$

#### SDI-GPI Link

Converts 16 digital inputs to tally data on the SDI out connector. Supports Blackmagic Design URSA Series and Studio cameras. Additionally 2x8 inputs/outputs can be added. Routing is configurable via UniSketch OS.

**₩** 869€ / 999\$

#### **ATEM-TCP Link**

This device is a network point that will bridge your TCP control applications to Blackmagic Design ATEM switchers. This is the solution for Crestron, Extron and similar AV systems that typically lets you set up a TCP connection. Most ATEM commands are systematically implemented for two-way data exchange.

#### **ETH-TALLY Link**

Connects multiple SKAARHOJ Tally Lamps using CAT5e or better cable. Lamps can be connected in a star-topology (every lamp connects to ETH-TALLY Link) or you can daisy chain up to three lamps on a single wire. ETH-TALLY Link is fully UniSketch capable so you can create tally for any device core you wish - like ATEM Switchers, vMix etc.

**₩** 599€ / 699\$

#### UniSketch OS

Point a web browser to the IP address of the controller

UniSketch OS is our software that connects a button press to your live show. It works by routing actions and state values between the interface components on the controller and your video switchers, recording decks and cameras on the set. You may never need to change the defaults, but if you do - it's really easy!
